R E S O L U T I O N

WHEREAS, the City of Pikeville, Kentucky, has embarked upon a program of community development to serve a large segment of the mining population and industry of Eastern Kentucky, and

WHEREAS, the economic base of Eastern Kentucky depends upon the extration of coal and its participation in National economy, and

WHEREAS, the coal industry has made great progress through technology and has been at an economic disadvantage because of its adverse position geographically, and

WHEREAS, we have an unemployment rate of 12.5 percent when the industry is relatively healthy, and

WHEREAS, the legislation now under consideration which would remove the gassy, non-gassy classification of mines under the guise of safety, and

WHEREAS, there are no gassy mines operating above drainage in Eastern Kentucky, and

WHEREAS, the disasters in mining in gassy mines where the present regulations apply, but were ineffectively enforced, suggest that better enforcement, where applicable, would be more intellectually honest than penalizing the non-gassy operations by arbitrary legislation, and

WHEREAS, the City of Pikeville is deeply committed to better standards of health and safety as well as general community development and support all measures contributing to real safety for our miners.

NOW, THEREFORE, be it resolved that the City Commission of Pikeville, Kentucky is thoroughly in opposition to the arbitrary legislation for mine safety which would remove the gassy, non-gassy distinction of present legislation. This legislation is ill advised and reflects a serious deficiency of knowledge about the coal mining process in Eastern Kentucky, or has been designed to do injury to a large segment of the coal industry by creating unnecessary costs under the disguise of safety.
